

## Kenya Seed Co. – *H629, H6210, H6213, H515, H516*

*H6210* performing well in Keumbu division, Kisii district

FIPS-Africa co-operates with Kenya Seed Co to promote *H629, H6210, and H6213* which are improved hybrid maize varieties suitable for the high altitude regions of Kenya. Kenya Seed Co. also provides samples of *H515, and H516* which are new, earlier-maturing varieties suitable for the mid-altitudes.

Kenya Seed Co. provides FIPS-Africa with small 150g packets of seed for its demonstrations and promotions. Promotions started in 2003, and demand for the new varieties has increased exponentially.
