## Pioneer Hybrid International - Phb 30G97, Phb 30V53, Phb 30H83, Phb 30G19

FIPS-Africa co-operates with Pioneer Hybrid International (PHI) to promote new varieties of hybrid maize. These varieties include Phb 30G97, Phb 30V53, Phb 30G19 and Phb 30H83.

Phb 30V53 is a new variety suitable for the high altitude areas of Kenya, and Phb 30G19 is suitable for the mid- to high altitude areas.

PHI provides FIPS-Africa with small 150g packets of seed for its demonstrations. PHI also provides FIPS-Africa with funds to inform Ministry of Agriculture extension workers and farmer group leaders on state-of-the-art methods of maize production.
