

Western Seed Co – WH 505, WH 403, WH504, WS 202

A farmer in Kirinyaga district content with his commercial crop of green maize using WH505 variety in Kirinyaga district

FIPS-Africa co-operates with *Western Seed Co* to promote improved maize varieties, These include WH505, WH504, and WH403 hybrids suitable for the mid altitude regions of Kenya, and WS202 which is an OPV suitable for the mid-low altitudes.

Varieties exhibit good tolerance to the Maize Streak Virus (MSV), drought, and poor soil fertility.

To date, *Western Seed Co.* has provided FIPS-Africa with over 100,000 small 150g packets of seed for its demonstrations and promotions.
