

Advisory Bulletin

Why use *Mavuno* fertilizers?

Mavuno Planting fertilizer

Mavuno planting fertilizer contains 11 plant nutrients

Plants require 15 nutrients for healthy growth. Most commonly-used fertilizers contain only 2 or 3. *Mavuno* contains 11! As soils are becoming acid, and deficient in K, Ca, Mg, S, and micronutrients, *Mavuno* supplies those nutrients which other fertilizers do not!

Table: Nutrient content (%) of different planting fertilizers

	N	P2O5	K2O	S	Ca	Mg	B	Zn	Mn	Cu
DAP	18	46	0	0						
17-17-17	17	17	17	0						
23-23-0	23	23	0	0						
SSP	0	19	0	12	24					
TSP	0	46	0	0						
<i>Mavuno</i>	10	26	10	4	8	4	++	++	++	++

Mavuno Topdressing fertilizer

The common topdressing fertilizers contain only Nitrogen (N). Soils are also becoming deficient in Sulphur (S) in many areas. *Mavuno-top* fertilizer contains S, in addition to N.

Table: Nutrient content (%) of different topdressing fertilizers

	N	Ca	S
Urea	46		
CAN	26	12	
<i>Mavuno-Top</i>	30	10	5

Mavuno fertilizers are suitable for all crops but especially for fruits and vegetables.

Mavuno fertilizers are available in affordable 1kg bags for between only KSh 35-40! Also available in 10kg, 25kg, and 50kg bags. Ask your stockist for more information.
